

A “no touch” station with large dispensing capacity. Unlike many hand-operated sanitiser products, this foot-operated station means you won't need to touch any surface with your hands, so cross-contamination is minimised. The 7.5-litre internal sanitiser reservoir provides a larger capacity meaning longer usage between refills, especially in “high footfall” areas: a vast improvement on small bottles or dispensers that run out multiple times per day.

• **'Mold in Graphics' do not crack or peel - can be cleaned easier, preventing further cross contamination**

• **Removable drip tray, allows for easy cleaning**

• **Self-priming foot pump, minimising cross-contamination from touch**

Features

- Self-priming foot pump
- Removable drip tray with stainless steel grid for easy cleaning
- Suitable for sanitiser liquids or gels with up to 80% alcohol content
- Rear lockable access door
- Adjustable flow valve for preferred dispensing amount
- Long term, safe solution to sanitiser dispensing
- Fully bunded compact outer housing for secure storage of flammable sanitiser products
- No electric or batteries required
- Internal ballast weight for increased stability
- Non-removable 'Mold In Graphics' – UV Protected, no fading, cracking or peeling, water proof and easily cleaned

Technical Data

Height:	1030mm
Width:	295mm
Depth:	290mm
Empty/Filled weight:	13kgs/20kgs
Capacity:	7.5 litre
Manufactured in:	Northern Ireland
Gel Station Product Code	CVP-SS75G
Liquid Station Product Code	CVP-SS75L

Suitable for:

✓ Indoor and outdoor use ✓ Schools / universities ✓ Retail ✓ Offices ✓ Factories ✓ Hospitality ✓ Sports & leisure facilities ✓ Outdoor events
